

Applications

Lighting for warehouses

To ensure the warehouse operates smoothly any product in the stockroom must be possible to locate quickly and easily. And a safe working environment should be offered in such warehouses without natural daylight. High lumens output, high efficient LED luminaries solution are demanded to meet these challenges of lighting for stockrooms. Except high efficiency, 5 years warranty and especially long life can significantly reduce power consumption and maintenance cost.

LED luminaries

a. LED T8 high bay tube

Outstanding luminous flux values and very low energy consumption makes LED T8 high bay tube to be an extremely effective energy saving alternative to high output fluorescent lamps. Extremely long service life, low maintenance costs, under 35000hrs Lab test, there are no color temperature floating but excellent lumen maintenance -- luminous flux is more than 93%, and easy to install make it a very attractive solution for illuminating warehouses.

b. LED corn light

Above Lights

Above Lights LED corn lights are easy to install and ready for immediate use. With efficiencies of upwards to 140lm/w and up to 85Ra CRI, 70% savings when comparing to metal halide! Now you can save energy without compromising brightness and with our five year warranty, low maintenance costs, you can put your mind at ease. We've incorporated the highest efficiency power driver that not only dissipates minimal heat, but offers some of the highest PFC performance and lowest THD values out there.

c. LED canopy lamp

Above Lights Mirae LED canopy light feature a slim, low-profile design that is easily mounted below canopies and building overhangs, and saving transport cost for our customers. Super high efficiency 125LPW helps us achieve a bright, clean, safe, and inviting appearance while using significantly less energy than traditional solutions.
